CHINA GROUND SOURCE ENERGY LIMITED

(Incorporated in the Cayman Islands with limited liability)
(Stock Code: 8128)

**Interim Results Announcement
For the six months ended 30 June 2013**

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (THE “GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of China Ground Source Energy Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

HIGHLIGHTS

Revenue for the six months ended 30 June 2013 (the “Review Period”) amounted to approximately HK\$133.78 million.

Net profit after tax of the Group for the Review Period amounted to approximately HK\$28.72 million.

No dividend was declared for the Review Period.

FINANCIAL REVIEW

The following table provides a brief summary of the financial results of China Ground Source Energy Limited (the “Company”) and its subsidiaries (collectively the “Group”). For more detailed information, please refer to the unaudited consolidated financial statements for the Review Period and the six months ended 30 June 2012.

	Three months ended 30 June		Six months ended 30 June	
	2013 <i>HK\$'000</i> (Unaudited)	2012 <i>HK\$'000</i> (Unaudited)	2013 <i>HK\$'000</i> (Unaudited)	2012 <i>HK\$'000</i> (Unaudited) (Restated)
Revenue				
– Shallow ground source energy utilisation	92,946	59,754	129,187	158,632
– Rental income	2,311	80	4,595	2,932
Total revenue	95,257	59,834	133,782	161,564
Profit for the period	25,972	3,875	28,722	12,453
Profit attributable to owners of the Company	27,626	2,818	29,132	7,642

During the Review Period, the Group’s revenue amounted to approximately HK\$129.19 million which was mainly contributed by shallow ground source energy utilisation business as compared with that of approximately HK\$158.63 million for the corresponding period last year. The revenue decreased by approximately HK\$29.44 million as compared with that of corresponding period last year, it was mainly attributable to the Group’s concentration on its guarantee operations projects in the first quarter. Besides, the Group adopted new technology in order to satisfy the new standards of The Technical Code for single Well Circulation Heat Exchange Geothermal Energy Collection Well, which was published by the Beijing Municipal Administration of Quality and Technology Supervision in April 2013, thus the progress of the work done was retarded.

The Group's gross profit margin increased from 45.8% in last corresponding period to 55.5% in the current period. It was mainly attributable to the fact that the Group secured a technical support and consultation agreement with large contract sum in the second quarter. That contact has a higher gross profit margin which leads to the gross profit margin increased during the Review Period.

Other income decreased from approximately HK\$7.25 million in the corresponding period last year to approximately HK\$4.36 million for the six months ended 30 June 2013. The decrease was mainly attributable to one-off recognition of the government grant in the corresponding period last year.

Selling and distribution expenses amounted to approximately HK\$32.60 million and HK\$3.61 million for the six months ended 30 June 2013 and 2012 respectively. In order to ensure the completed projects to meet the new standards, the Group committed to provide free modification, installation and testing of the customers' ground source energy collection equipment so as to optimizing/improving of the customers' ground source energy utilisation system, thereby enhancing the promotional effect, which attributable to the increase in selling and distribution expenses during the Review Period. Besides the initial investment in market development lead to a significant increase in selling and distribution expenses.

During the Review Period, the Group granted share options to the directors, chief executives, employees and business associates of the Company, this lead to the share-based payment increased from HK\$3.14 million in the corresponding period last year to HK\$11.48 million in the current period. Administrative expenses amounted to approximately HK\$44.16 million and approximately HK\$39.01 million for the Review Period and the six months ended 30 June 2012 respectively. The increase was mainly due to the increase in the staff costs and research and development costs. The Board believes that the Group's continuous expansion depends upon our ability to employ and retain management and technical personnel with the ability to design, utilise, and enhance our services and products. In addition, the Group disposed of a portion of self-built demonstration building in Beijing during the Review Period and it resulted in a gain of approximately HK\$51.57 million.

Finance costs amounted to approximately HK\$2.59 million for the Review Period as compared with HK\$1.75 million for the last corresponding period. The finance costs was the imputed interest expenses of receipt in advance on the rental income.

Profit attributable to owners of the Company was approximately HK\$29.13 million for the six months ended 30 June 2013 and approximately HK\$7.64 million for the corresponding period last year.

Order Book

As at 30 June 2013, the Group has contracts on hand of approximately HK\$402.13 million.

Investment Properties

The Group's investment properties as at 30 June 2013 were valued at HK\$299.83 million. This resulted in an increase in fair value of investment properties of approximately HK\$7.76 million (2012: HK\$4.29 million) which was recognised directly in income statement for the Review Period.

Liquidity, Financial Resources and Capital Structure

Net current assets of the Group as at 30 June 2013 was approximately HK\$521.06 million (31 December 2012: approximately HK\$600.94 million). As at 30 June 2013, the Group had cash and bank balances of approximately HK\$114.28 million (31 December 2012: approximately HK\$156.46 million). Cash shown on our statement of financial position include funds available for general corporate purposes.

Non-controlling interest amounted to approximately HK\$40.68 million which mainly represents the interest attributable to non-controlling shareholders of the Group's subsidiaries in the PRC.

Charges on Group's asset

As at 30 June 2013, no Group's asset has been charged.

Gearing Ratio

The gearing ratio of the Group was maintained at 0% as at 30 June 2013 (31 December 2012: 0%).

Foreign Exchange Exposure

The Group continues to adopt a conservative treasury policy with all bank deposits being kept in either Hong Kong dollars, or in local currencies of the operating subsidiaries, keeping a minimum exposure to foreign exchange risks.

Contingent Liabilities

As at 30 June 2013, the Group had no material contingent liabilities (31 December 2012: Nil).

Employees

As at 30 June 2013, the Group has approximately 500 employees in total (31 December 2012: approximately 490). The remuneration package of the employees is determined with reference to their performance, experience and their positions, duties and responsibilities in the Group.

BUSINESS REVIEW AND PROSPECTS

The Group focuses on the development and utilization of shallow ground source energy as the alternative heating (cooling) energy for buildings, which, as an important part of the energy conservation and environmental protection mission, have received increasing attention from the society community and great supports from the state, local governments and users at all levels. Having been upgraded to a national strategy, energy conservation and environmental protection have become a vital momentum for the transformation of developmental mode and the acceleration of restructuring which will propel the industrial transformation and upgrading.

Ever Source Science and Technology Development Group Ltd. (“HYY”), the technological and industrial headquarters of the Group, has made constant breakthroughs and innovations in research and promotion of the professional technologies for using shallow ground source energy as the alternative heating (cooling) energy for buildings, which have achieved remarkable results. The Technical Code for Single Well of Geothermal Energy Collection with Circulation Heat Exchange, a set of local standards for Beijing released by Beijing Municipal Administration of Quality and Technology Supervision (北京市質量技術監督局) and administrated and implemented by Beijing Water Authority (北京水務局) which is jointly drafted by Beijing Association to Promote Energy Conservation and Environmental Protection (北京節能環保促進會), China Energy Conservation and Environmental Protection Group (中國節能環保集團公司) and Ever Source Science and Technology Development Group Ltd., became effective on 1 April 2013. The implementation of the standards has laid the foundation for the industrialization development of the third type^{Note} of ground source energy collection technology, the only one of its kind in the world and an original innovative technology developed by China. By adopting the single-well circulation heat exchange technology, sufficient zero pollution energy will be collected in an efficient, environment-friendly and land-conserving manner under any geological conditions and be provided to heat pump products so as to provide heating (cooling) to buildings. The emerging industry of shallow ground source energy as the alternative heating (cooling) energy to buildings is an integrated industry of heating and cooling, which is evolved from the traditional separate industries of heating and cooling. The implementation of the Technical Code allows enormous room for the vast development of this emerging industry.

The specialised companies under the Group are primarily engaged in the businesses of design, management of energy contract, manufacturing of system and equipment, proprietary technology service, professional exploration and collection of ground source energy and installation of electrical and mechanical equipment. Under the business expansion model featuring “specialised corporate operation and group-wise regional development” established by the Board, the Group constantly enhanced the specialization of its subsidiaries in various industries and continuously expanded regional coverage by catering to the features of different climatic regions.

During the Review Period, the Group made certain achievements in business expansion. The Group won the bid for the ground source energy heat pump system project for a commercial district with an area of 150,000 sq.m. in Taiyuan, Shanxi Province, which will beat the height of the existing domestic buildings applied with ground source energy heat pump system and become the highest engineering project that uses ground source energy for heating (cooling) in buildings. In addition, the Group entered into patent licence agreements with large domestic property developers. Through close cooperation with property developers, the Group accelerated the promotion of ground source energy application technology and broadened the income sources of proprietary technology. Meanwhile, under the sales and purchase agreement for products and services entered into by the Group and China Energy Conservation and Environmental Protection Group, the two parties proactively pushed ahead mutual business cooperation. A self-built ground source energy for heating demonstration project of the Group in Beijing has been completed and put in operation.

It is believed that with the relentless efforts of the operating and managing teams, the operation results will record further improvement.

Note: Besides utilization of natural energy derived from rivers, lakes and oceans and recovery of residual heat to provide low-grade energy for heat pump products, there are three ways generally applied in the international community to collect ground source energy: 1. pump well (efficient, but may cause water loss, pollution and potential geological hazards); 2. buried pipe (environment-friendly, but inefficient and requires large areas of land); and 3. single-well circulation heat exchange (efficient, environment-friendly and land-conserving).

FINANCIAL RESULTS

The Board of Directors (the “Board”) of China Ground Source Energy Limited (the “Company”) is pleased to announce the unaudited consolidated results of the Company and its subsidiaries (the “Group”) for the three months and six months ended 30 June 2013 together with the unaudited comparative figures for the corresponding periods in 2012 as follows:

Notes:

- (a) The share premium of the Group includes (i) the excess of the issue price over the nominal value of the Company's shares issued at a premium and (ii) the difference between the nominal value of the share capital of the subsidiaries acquired pursuant to the Group's reorganisation scheme in preparation for the public listing of the Company's shares on the Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (the "Reorganisation") in 2001 over the nominal value of the share capital of the Company issued in exchange therefore.
- (b) In accordance with the relevant People's Republic of China (the "PRC") regulations and joint venture agreements, the Sino-foreign joint ventures established in the PRC shall set aside a portion of their respective profit after tax, if any, to the statutory reserve. Such amount will be determined at the discretion of the board of directors of the respective entity.
- (c) Contributed surplus represents the cancellation of the paid-up capital and set off against the accumulated losses in prior year.
- (d) Special reserve represents the reserve arising from acquisition of additional interests of a subsidiary from non-controlling interests.
- (e) Capital reserve represents the deemed contribution from a substantial shareholder arising from the waiver of the convertible notes in prior year.

16. EVENTS AFTER THE REPORTING PERIOD

On 8 July 2013, Ever Source Science and Technology Development Group Limited (“HYY”), a subsidiary of the Company, and China Energy Conservation and Environmental Protection New Material Investment Company Limited (“New Material Investment Company”) and Fujian China Energy Conservation and Environmental Protection Quancheng Investment Company Limited (“Quancheng Investment”), connected persons to the Group, have entered into a termination agreement (the “Termination Agreement”) by which all parties mutually agreed to terminate the capital increment agreement (the “Capital Increment Agreement”).

Pursuant to the Termination Agreement, within three days upon signing of the Termination Agreement, Quancheng Investment shall refund to HYY the consideration (“Consideration”) of RMB40,000,000 paid by HYY pursuant to the Capital Increment Agreement signed on 4 February 2013. Quancheng Investment shall also pay a fund possession charge at an annual rate of 10% for the actual time of keeping the Consideration, which will be calculated from the date of payment of the Consideration by HYY to the date of the signing of the Termination Agreement. If Quancheng Investment fails to fully refund the Consideration and pay the relevant fund possession charge within the specified time as agreed in the Termination Agreement, New Material Company shall pay HYY the liquidated damages for the amounts payable at a daily rate of 0.05% until all the Consideration and the fund possession charge is fully settled. Pursuant to the Termination Agreement, New Material Company has joint and several obligations for the refund of the Consideration and payment of fund possession charge and liquidated damages (if any). Upon full refund of the Consideration of RMB40,000,000 and full payment of the relevant fund possession charge to HYY, the fulfillment by HYY and New Material Company under the Capital Increment Agreement shall be completely terminated and HYY and New Material Company shall be released and discharged from all rights, obligations, claims and debts arising from the Capital Increment Agreement. Details of the termination are set out in the announcement of the Company dated 8 July 2013.

As at the date of this announcement, the Group had fully received the Consideration and the related fund possession charge.
